
Primeros trazos del abecedario

Nombre:

_____

Sugerencia de uso del cuadernillo:

Acerca de las primeras lecciones de escritura
Charlotte Mason nos dice:

"El bolígrafo debe sostenerse en una posición cómoda, bastante cerca de la punta, con los dedos y el pulgar algo doblados y la mano descansando en el papel.

El escritor también debería poder apoyarse a sí mismo con la mano izquierda sobre el papel, escribiendo en una posición relajada, la cabeza inclinada, pero sin inclinarse él mismo.
Es innecesario decir que, si los niños no tuvieran ese don feliz de hacer marcas de araña con la punta sostenida de lado, debe usarse la parte plana de la pluma estilográfica. En todas las lecciones de escritura, tanto el profesor como los niños debieran usar libremente la pizarra para modelar y practicar."

En esta etapa de su trabajo, el sentido de la belleza tanto en la escritura como en las líneas que copian debería inspirarlos y darles placer. No deben dedicarse más de diez minutos o un cuarto de hora a las primeras lecciones de escritura, porque si demoran más tiempo, los niños se cansan y se descuidan." Volumen 1 Charlotte Mason.

Dicho lo anterior, este cuadernillo está pensado como una herramienta sencilla para reforzar el trazo correcto escrito a lápiz de las letras, y ayudará a reconocer cual es el mejor trabajo del niño.
La primer línea se usa para el trazo de la letra mayúscula,
la segunda línea para la letra minúscula y al finalizar el ejercicio el niño deberá observar y reconocer su mejor trazo para encerrarlo en color rojo.

Esperamos sea de bendición para su familias.
